

## **Technical Service Bulletin 07-02-2019:**

### **Cartridge Sticking in Chamber:**

If a round sticks in the chamber or chambers and doesn't fire, it could be a problem with the cartridge or the chamber itself. If you have this type of malfunction, the barrel must be inspected. To gauge: the chamber must "plunk" with .365 gauge pin for 9mm chamber. We inspect and repair barrels at no charge so please contact BRP Corp at 678-425-9585 or [info@brpguns.com](mailto:info@brpguns.com). We are here to support the products if you need us some please don't hesitate to call or write.
